

Outdoor Flexible Concrete Coatings

These coatings create a decorative, flexible surface that can hold up to harsh exterior environmental conditions.

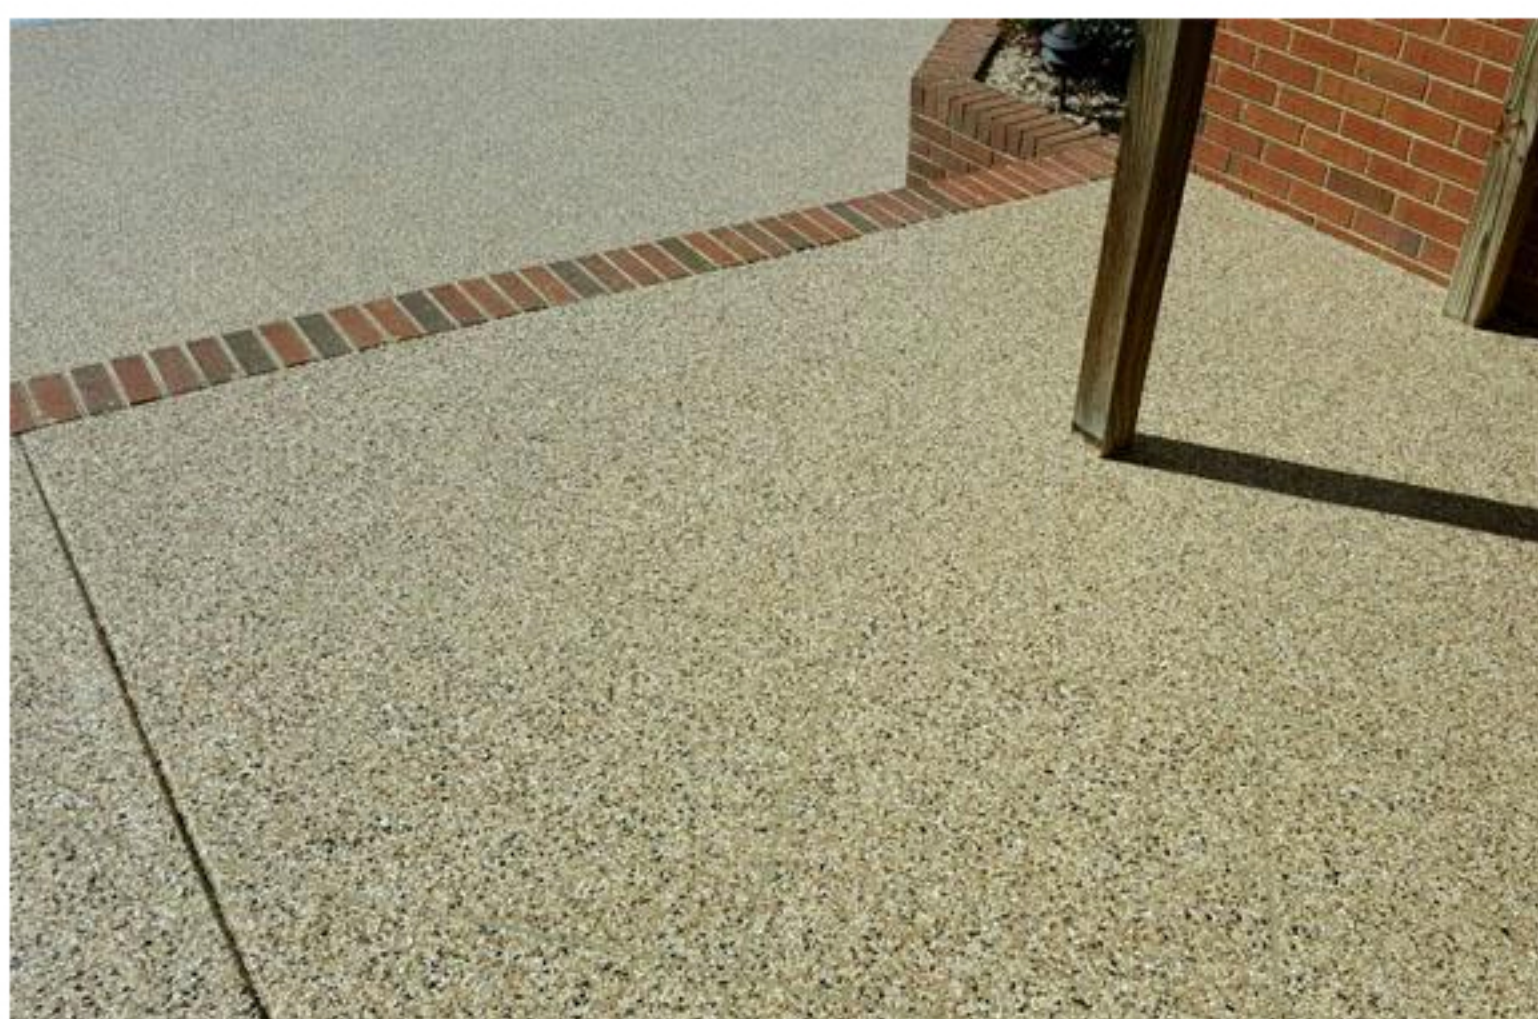

CREATE A DURABLE, DECORATIVE SURFACE.

These durable exterior coatings can be used in high traffic exterior areas

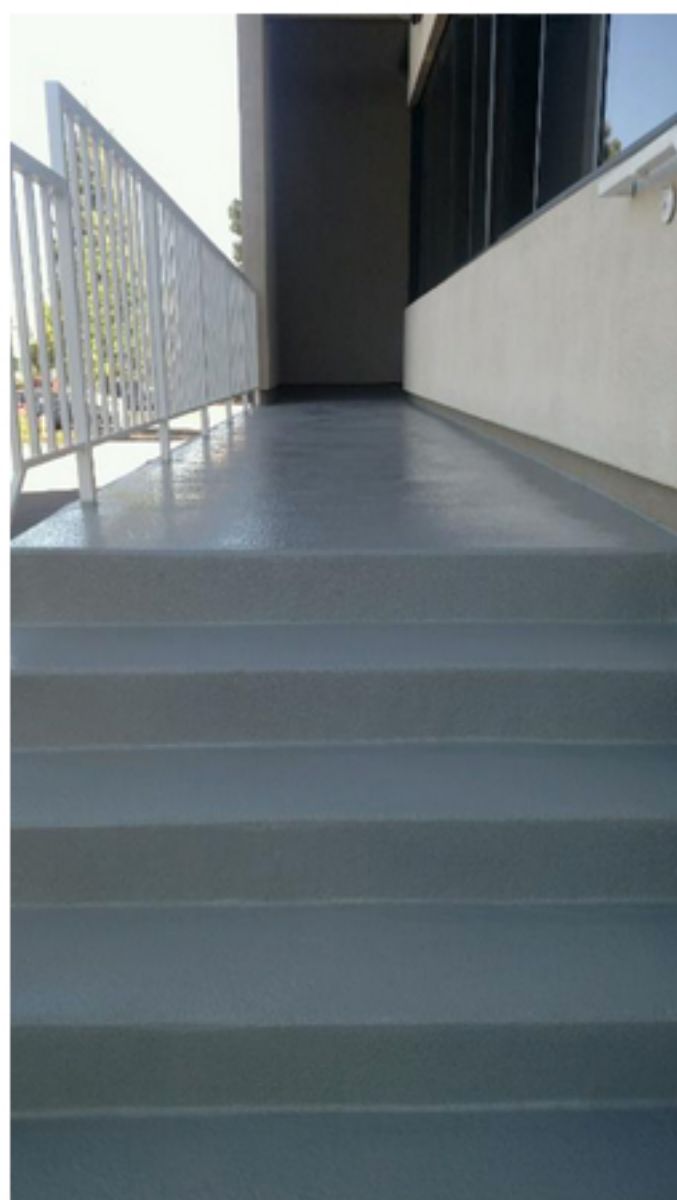

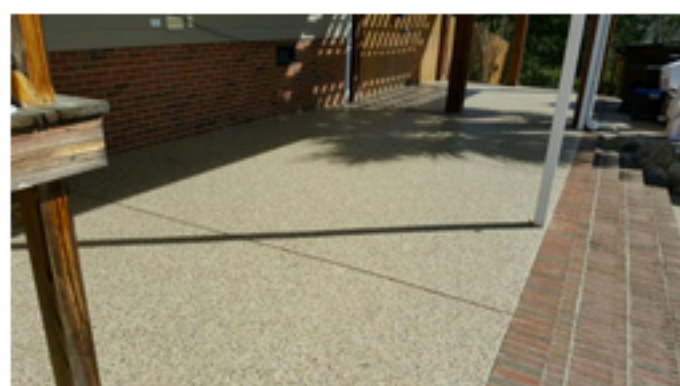

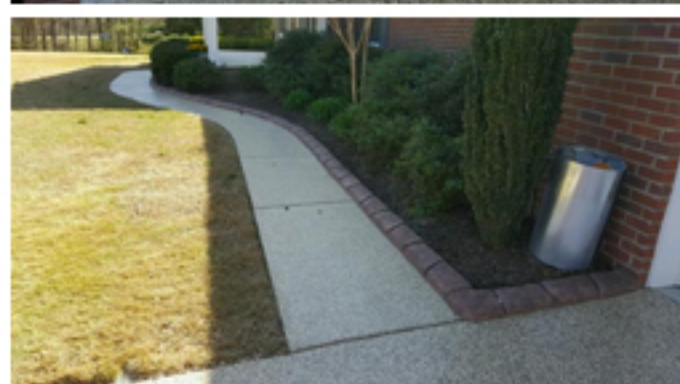

This durable system can bridge substrate cracks and is flexible in cold temperatures. Additionally, the systems provides superior waterproofing protection, while withstanding heavy traffic.

With the use of an anti skid aggregate in the exterior coating system, added slip resistance is provided. Decorative quartz sand or decorative flakes can also be used to create an attractive, highly decorative finish.

These system are an excellent choice for outdoor residential, commercial and industrial areas.

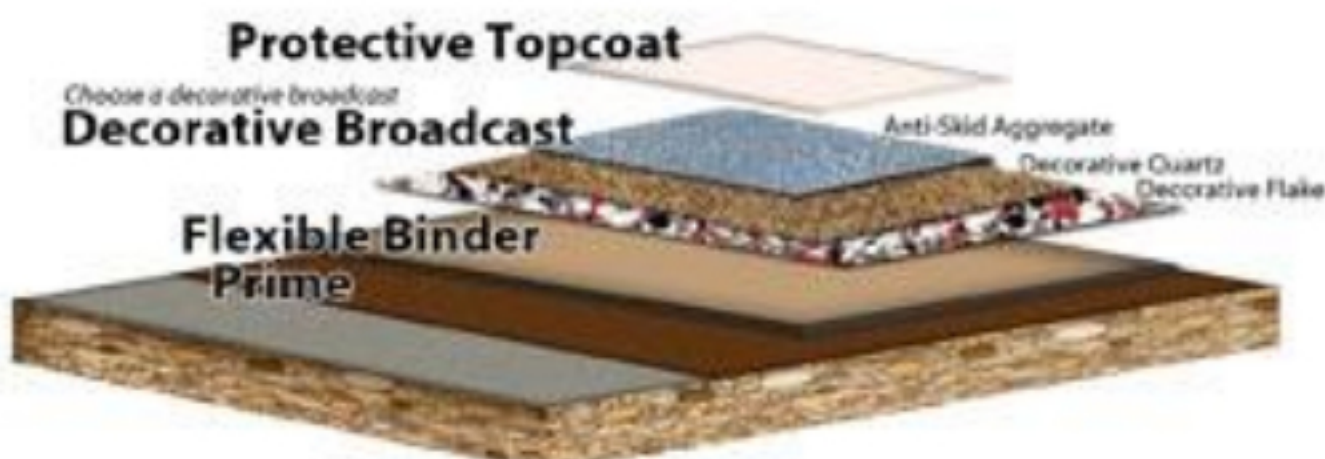

With excellent UV resistance and color retentive properties, outstanding waterproofing characteristics, and flexibility our exterior coating systems are great for patios, balconies, pool decks, rooftop decks, and other outdoor areas.

SIMPLE AND EASY TO INSTALL!

A variety of decorative solutions can be created.

NPI's exterior concrete coating system is an easy to install 4 step system with options for creating a variety of decorative textures.
